Fast learner enthusiastic about creating practical solutions to everyday problems as a software engineer and seeking to grow my technical and team skills in an impactful work environment. Interested in the areas of diffusion models and machine vision.

Education:

University of California San Diego, San Diego, CA | M.S: Computer Science

September 2025 - June 2026

- Cumulative GPA: 4.0
- Relevant coursework: Machine Learning, AI Probabilistic Models, AI Search & Reasoning, Statistical NLP

University of California San Diego, San Diego, CA | B.S: Computer Science

September 2022 - June 2025

- Cumulative GPA: 3.862, Major GPA: 3.941
 - Completion of honors program related to diffusion models for text-to-image generation with highest distinction
-

Work Experience:

SDE Intern — AWS

June 2025 - September 2025

- Responsible for individually completing on a project oriented around understanding customer usage patterns and experiences of a new tool that's already in production and planned to become the new standard for thousands of technicians across multiple regions
- Full stack development of collecting frontend data in a React website as well as a CLI interface and securely passing it through backend API endpoints to end up on a comprehensive dashboard
- Came up with and completed stretch tasks to further enhance the final product on top of the original expectations
- Learned to adapt to and understand new tools, languages, and work environments related to completion of the project

CSE Instructional Assistant — University of California, San Diego

September 2023 - Present

- Leading self-organized weekly office hours to personally further the understanding of over 20 students a session in the topics of discrete math, algorithm analysis and design, and computability theory
 - Responsible for organizing and monitoring the class forum which receives nearly 60 questions per week in order to elevate student engagement and understanding of material through contributing over 80% of the 500+ total instructor answers with an average response time of only 9 minutes for a class of 430+ students
 - Actively collaborating with a small team by participating in weekly team meetings to grade and give feedback on the work of 430+ students per week, as well as proctor 3 hour long exams
 - 100% approval rating from 50+ unique students based on end of quarter evaluations
-

Skills:

Java, C/C++, Python, JavaScript, HTML, CSS, Django, Go, Tensorflow, Flask, React, AWS, SQL, Git, Android Apps

Projects:

[Calex](#): AI text recognition to generate different difficulty levels of texts, 1st place in AuburnHacks

[Digit Recognizer](#): CNN handwritten single digit recognition using the MNIST dataset

[Data Tracker](#): Automated data collection through web scraping to generate visually simple information using Python

Seating Chart Generator (In progress): Tensorflow CNNs for sectioning and classifying PDFs to produce ready-to-use CSVs
